

SOLARSTEM

CORPORATE DOSSIER

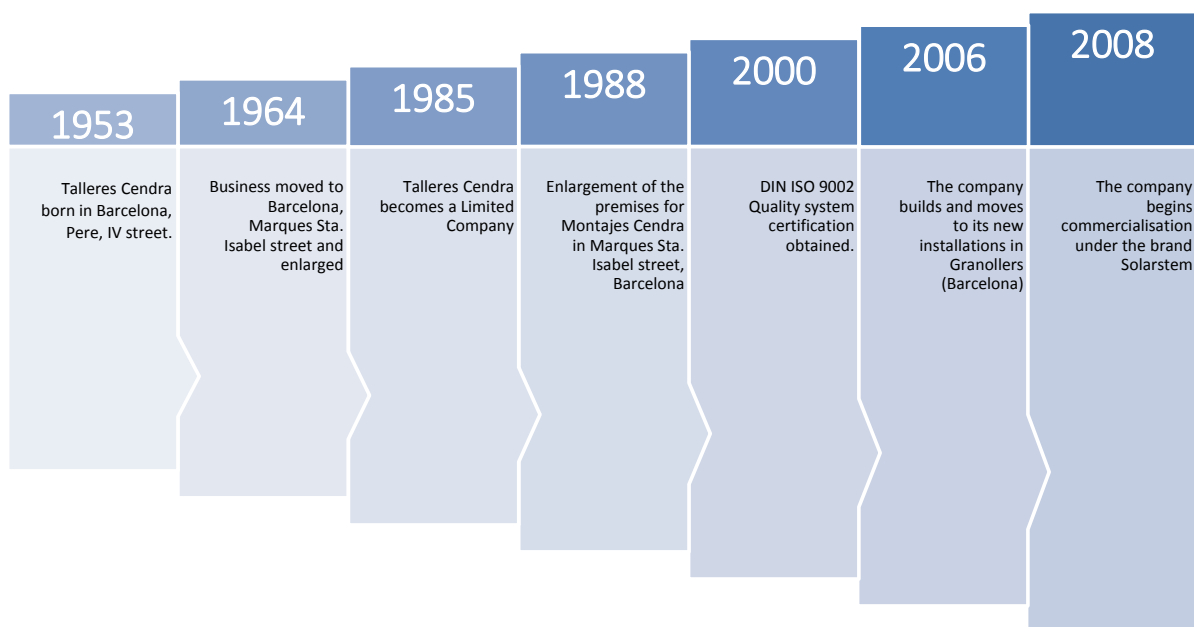

The background of the entire page is a photograph. The upper portion shows a tall, modern building with a grid-like facade of windows. The lower portion shows a close-up, perspective view of solar panels mounted on a roof, with white mounting rails and dark photovoltaic cells. A semi-transparent blue rectangle is overlaid on the upper part of the image, containing the main title. Another semi-transparent blue rectangle is overlaid on the lower part of the image, containing two columns of text.

WHO ARE WE... EVERYTHING BEGINS WITH A STRUCTURE

Since 1953, Talleres Cendra, S.A. has been manufacturing components for the principal companies in the automotive and construction sectors, in 2008 it created its own brand specialised in designing and manufacturing systems for mounting photovoltaic cells and solar collectors called Solarstem.

From the very beginning we wanted to position the Solarstem brand as a benchmark for quality and innovation, providing a product with solutions that will increase the efficiency of the installer.

History of Talleres
Cendra, S.A.

WHAT WE DO

SOLUTIONS FOR SECURING PHOTOVOLTAIC MODULES AND SOLAR COLLECTORS

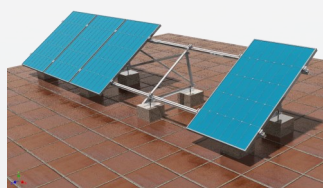

Solarstem has two product lines: Customized systems and standard structures, the latter being especially focused on manufacturers of solar collectors and photovoltaic modules.

All the mounting systems and mass produced structures are supplied in versions for flat roofs, sloping roofs and solar farms.

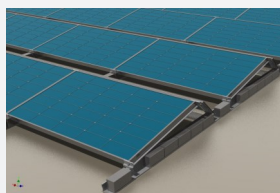

MOUNTING SYSTEMS FOR FLAT SURFACES

MASS PRODUCED STRUCTURES

REFERENCES CLIENTS AND PROJECTS CARRIED OUT: OUR BEST BUSINESS CARD

Solarstem has clients all over Europe, among which are some of the most important companies in the sector.

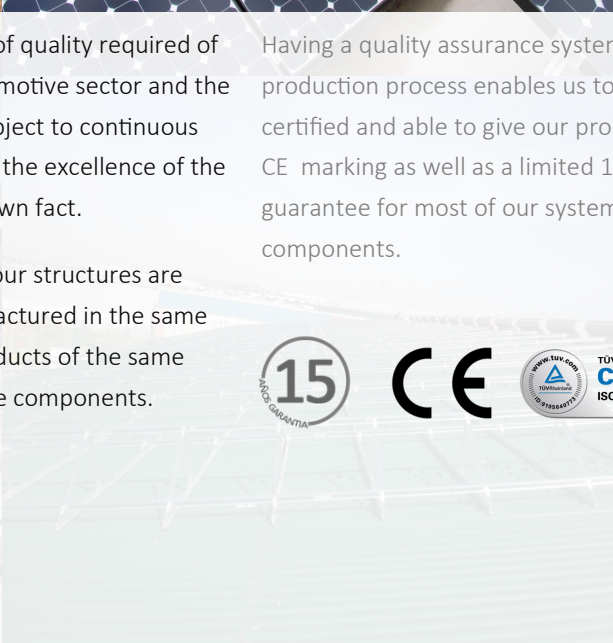

Our success is based on offering a top quality product that enables our clients to concentrate on their product by not having to worry about something that is not a key element in their business area.

The very high levels of quality required of suppliers in the automotive sector and the fact that they are subject to continuous evaluation to ensure the excellence of the product is a well known fact.

The components of our structures are designed and manufactured in the same way, resulting in products of the same quality as automotive components.

Having a quality assurance system in the production process enables us to be certified and able to give our products the CE marking as well as a limited 15-year guarantee for most of our systems and components.
