

Declaration of
performance and
CE marking

Customised,
personalised for
each client

For any type of
solar collector
and surface

Used by the
principal
European
manufacturers

CUSTOMISED STRUCTURES

FOR SOLAR COLLECTORS AND PHOTOVOLTAIC MODULES

NO NEED TO WORRY ABOUT THE STRUCTURES

If you are a manufacturer or distributor of solar collectors or photovoltaic modules, making structures may not be your priority.

Clients from all over Europe rely on our structures and incorporate them as accessories to their solar collectors.

Regardless of the way you commercialise the structures, either by components, kits, etc. as we are manufacturers, we can adapt them to your method of working.

GUARANTEED STRUCTURES

According to European Directive (EU) 305/2011, to sell a construction product in the European Union, the manufacturer is obliged to issue a Declaration of Performance and to bear the CE mark. At the same time, the distributor must ensure that the product, if necessary, bears the CE mark, accompanied by the necessary justification.

Solarstem is certified by the TÜV Rheinland organisation and can bear the mark on its structures.

Likewise, the company has a certified quality system for designing and manufacturing structures according to the ISO 9001:2000 standard.

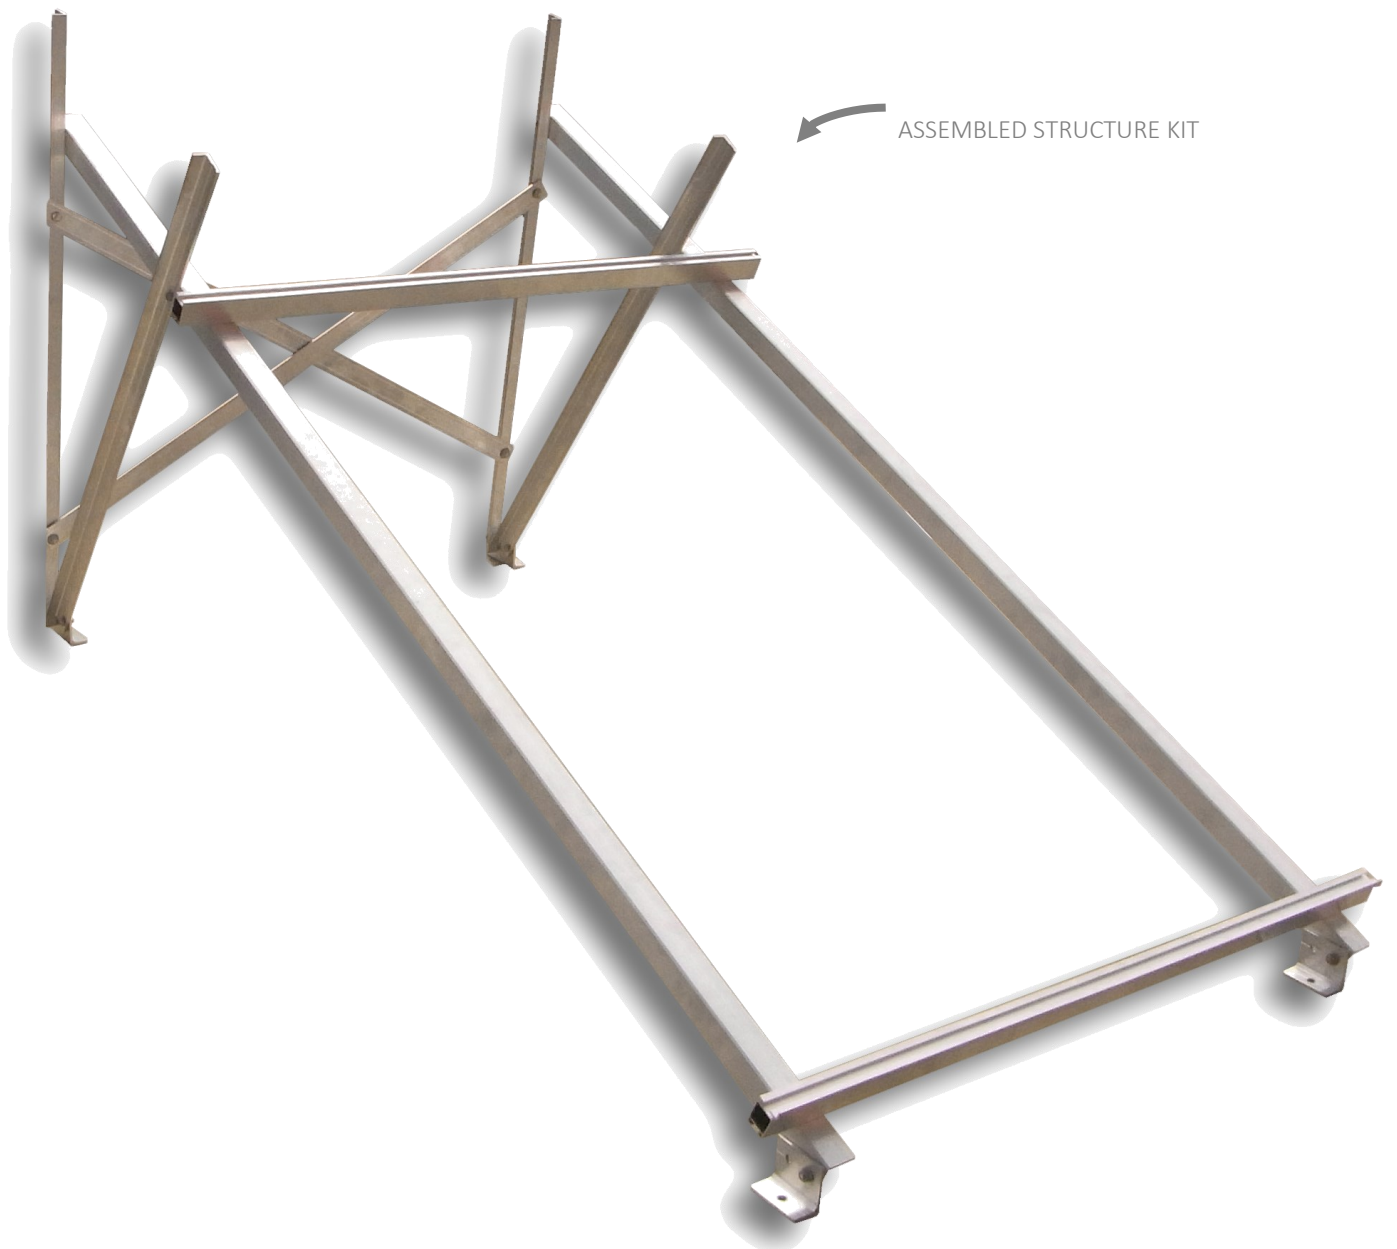

Estructura coplanar de superficie inclinada, fabricada en aluminio y fijaciones salva-teja de acero inoxidable.

Estructura de superficie plana para dos captadores con depósito, fabricada en aluminio.

CUSTOMISED STRUCTURES

THE CLIENT DECIDES HOW THE STRUCTURES ARE GOING TO BE MADE

According to the client's instructions, the different structures that configure the catalogue are put together. Basically, decisions are made according to the amount of collectors, types of surfaces (ceiling, terrace, façade...) and the accessories to be included, such as fasteners.

Each of the structures will be designed to bear loads such as snow or wind according to the area where the Client is to install it and which the final consumer should take into account.

We can make structures in different materials and finishes such as aluminium, galvanised steel, painted steel, etc. The structure can also be supplied in different stages of assembly, most commonly in kit form, including all the dismantled elements individually packed.

El Labelling, packaging and manuals can be personalised with the client's brand logo.
